# Be A Man About It

Building a healthier idea of masculinity

George Bell

[View on Edelweiss](#)

## A practical and contemporary discussion of what it means to be a man today

Men are cracking under the immense pressure of culturally created and rigid norms, traditions and beliefs. *Be A Man About It: Building a Healthier Idea of Masculinity* delivers an insightful and eye-opening new discussion of modern masculinity.

George Bell lays out how a silent pressure cooker is building in men, fuelled by the weight of historical, biological, and societal context. This pressure is reaching breaking point, exploding into challenges men are facing in everyday life. Hidden taboos and stigmas, the things we talk about and the things we don't, the conversations we should be having, but aren't. Addictions, a growing male loneliness epidemic, a resistance to healthcare support, sexual function issues, a growing suicide rate, and more.

But there is an attainable future where we can release this pressure in healthier ways. Bell puts forward ideas for how we can build a more flexible idea of masculinity, celebrate our men and thrive alongside women.

Each section is packed with first-hand insights, modern data and research, and comments from a wide variety of guests and experts, including army veterans, athletes, professors, doctors, authors, artists, first responders and people who have lost others or nearly lost themselves.

### Inside the book:

- An examination of how a silent pressure cooker is building in men and reaching devastating breaking points, and how we can release this pressure in healthier ways.
- Updated language that avoids the pitfalls of old, unproductive phrases like "be a man about it".

Be UPFRONT rips up the old rulebook and hands you a new one, 24 new rules for building confidence your way. This isn't about faking, forcing, or waiting until you feel ready. ## Harness the power of taxonomies for better human capital management and employee wellbeing

In *Job Architecture*, economist and entrepreneur Ben Zweig offers a revolutionary approach to transforming human capital management through the power of taxonomies. The book follows the experience and ideas of key individuals—from the founders of Wall Street, to the original management consultant, to a young data scientist just out of grad school looking to make sense of the modern workforce—in order to illustrate why our current human capital infrastructure is not serving employees well and what we can do to change that.

By categorizing and organizing workforce data, Zweig provides a practical roadmap for creating a more efficient and data-driven labor market. This book includes key insights on how to:

- Use AI and similar large language model technologies to support businesses with appropriate categorization and regimentation of data
- Know whether or not a taxonomy can be useful and functional for an organization in their ability to be flexible, auditable, and adaptable
- Build a taxonomy that meets the needs of a workforce or organization through clustering, labeling, and production

Combining storytelling with real-world examples, theoretical analysis, and a practical framework, *Job Architecture* is an essential guide for companies to manage a competitive, modern workforce that improves the working experience for all employees.

# The Dao of Capital

Austrian Investing in a Distorted World

Mark Spitznagel

[View on Edelweiss](#)

As today's preeminent doomsday investor Mark Spitznagel describes his *Daoist* and *roundabout* investment approach, "one gains by losing and loses by gaining." This is *Austrian Investing*, an archetypal, counterintuitive, and proven approach, gleaned from the 150-year-old Austrian School of economics, that is both timeless and exceedingly timely.

In *The Dao of Capital*, hedge fund manager and tail-hedging pioneer Mark Spitznagel—with one of the top returns on capital of the financial crisis, as well as over a career—takes us on a gripping, circuitous journey from the Chicago trading pits, over the coniferous boreal forests and canonical strategists from Warring States China to Napoleonic Europe to burgeoning industrial America, to the great economic thinkers of late 19th century Austria. We arrive at his central investment methodology of *Austrian Investing*, where victory comes not from waging the immediate decisive battle, but rather from the *roundabout* approach of seeking the intermediate positional advantage (what he calls *shi*), of aiming at the indirect means rather than directly at the ends. The monumental challenge is in seeing time differently, in a whole new *intertemporal* dimension, one that is so contrary to our wiring.

Spitznagel is the first to condense the theories of Ludwig von Mises and his Austrian School of economics into a cohesive and—as Spitznagel has shown—highly effective investment methodology. From identifying the monetary distortions and non-randomness of stock market routs (Spitznagel's bread and butter) to scorned highly-productive assets, in Ron Paul's words from the foreword, Spitznagel "brings Austrian economics from the ivory tower to the investment portfolio."

*The Dao of Capital* provides a rare and accessible look through the lens of one of today's great investors to discover a profound harmony with the market process—a harmony that is so essential today.

## About the Author

**Mark Spitznagel** is the founder and President of Universa Investments, an investment advisor that specializes in equity tail-hedging—or profiting from extreme stock market losses as a means of enhancing investment returns. In addition to hedge fund investing, Spitznagel's twenty-year investment career has ranged from independent pit trader at the Chicago Board of Trade to proprietary trading head at Morgan Stanley. He also owns and operates Idyll Farms in northern Michigan.
