

TABLE OF CONTENTS

1	Introduction	4
1.1	Extended Cell Monitoring and Temporal Measurements	6
1.2	Capturing Rare Events	6
2	Applications in Neuroscience	7
2.1	Neuronal Health and Apoptosis	8
2.2	Neurite Dynamics	9
2.3	Neuronal Activity Measurements	10
	Example Case: Taxol-induced Neurotoxicity	11
2.4	Applications in Neuroimmunology	12
	Example Case: Microglial Phagocytosis of Apoptotic Cells and Disease-related Protein Aggregates	
	Example Case: Differential Mechanisms of Phagocytosis and Efferocytosis	13
	Example Case: Microglia Chemotaxis	14
2.5	Further Read	15
3	Applications in Immunology	16
3.1	Proliferation and Counting	17
3.2	Activation and Differentiation	18
3.3	Immune Cell Killing	20
3.4	Phagocytosis and Cell Clearance	21
3.5	NETosis	22
3.6	Antibody Internalization	23
3.7	Further Read	24
4	Multi-Spheroid, Co-cultured, 3D Tumor Assays	25
4.1	Influence of Stromal Cells on Multi-Spheroid Morphology	26
4.2	Growth and Shrinkage Assay for Pharmacological Analysis	28
4.3	Herceptin-induced ADCC in HER2-Positive Multi-spheroids	30
4.4	Conclusions / Further Read	32
5	Summary	33
6	References / Imprint	34
