

April 11, 1965 To Prof. Nozoe - Although I failed all of your examinations on prediction of reactions of tropenoids, Japan was superb. The seminar was stimulating and hospitality cannot be surpassed.

George S. Hammond

April 11, 1965

Dear Prof. Nozoe: It has been a wonderful FIRST Japan-US Science Seminar in physical organic chemistry. A truly memorable time for all of us - for which we are deeply grateful to you and your colleagues. I trust that the seeds of lasting friendship and cooperation we have sown here, will flourish for years to come.

"Itadakimasu", we can all say of your hospitality, and finally GOCHISOSAMA! and SAYONARA!!

John D. Roberts
