In opolones are much to difficult for me. I
 keep to something simple like \square .

May all transitions between Japan
 and the USA be "allowed" with
 $f = 1.00$! (Also the primary ϕ
 should be 1.00!). For me, this
 "mixing of states" has been a memorable
 experience, one I shall always treasure,
 and (hint) hope to renew in
 the near future

Jim Pitt

Professor Nozoe
 in warmest admiration and
 gratitude for his kind hospitality
 Harry J. Gearing
 University of Alberta

To Professor Nozoe and his wonderful family;
 This has been my first and I sincerely
 hope not my last trip to Japan. Tokyo is not
 only famous as the largest city in the world
 but the hospitality of her people is
 unsurpassed. The West has much to
 learn from the East.
