

(480)

It has been a great pleasure to see you again,  
Professor Noze, and to meet your charming wife.  
We hope you will return many times to Hawaii.

Aloha,

Alicie Scheuer

A pleasure to welcome you again  
in Hawaii! Now that the first tropolone  
derivative has been isolated from a marine  
animal, I hope you will come again  
soon.

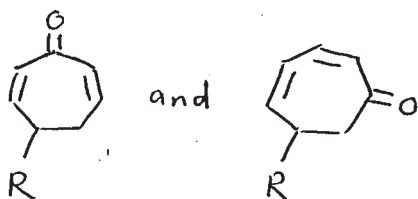

Honolulu, Sep 22, 1972

Elizabeth Scheuer

It was so nice to have met you  
at the University today. You know,  
I feel very honored to sign a  
book with next to such important  
professors. Thank you and good  
luck always.
