

May "aromaticity" survive until ISNA III
 (B. Andruszko)

Mit besten Grüßen und Wünschen
 anlässlich ISNA II G. Schröder

To Prof. Nozoe - A leader in physical-organic chemistry
 - and especially in seven-membered ring organic
 from my days as a graduate student. Permit me
 to mention several seven-membered ring
 antiaromatic compounds and to predict many
 more by the time of ISNA III.

With very best wishes -

Stuart W. Staley

= D_{4h} symmetrical structure.

Yoneda with Prof. Schröder and Prof.
 Staley.

in Banquet.
