

August 3, 1976

In the last year, we were able to synthesize the following antigenic determinants for human blood groups both as immunosubstrants and artificial antigens which raise monospecific antibodies in animals.

B - blood group.

lewis b blood group

lewis-d blood group (?)

But mainly, I was favored by a visit by you to my summer home in Jasper where I understand you had a very pleasurable period of time with your family which I cherish very much.
