This time I had the great pleasure of attending your seminar (for the first time!) I didn't understand any of it, but maybe in a few years, I will. It's exciting & scary to be at the start of graduate school — I can only hope that I survive till you write again.

Hiwko
see you
soon!

SEPT 27, 1980

U.C.L.A.

I feel rather intimidated in the august company of this book's (nobel prize winners vs. a rookie grad student) many contributors and thus I can't think of a suitably impressive chemical reaction so I will just say thanks much for your thoughtfulness and I look forward to seeing you soon (in Japan??).

SALUT!
