

=16.

I find your lecture highly enjoyable and very informative. It was a great pleasure to have you, and I hope with you. It is a big thing and a very good example for younger students and chemists.

Amsterdam, Feb 1987
 Jack Hinman

A great pleasure to have listened to your talk with many nice examples of chemical reactions which will certainly motivate students because of the high yields and nice colours of the compounds.

I am working in the field of mass spectrometry and ion cyclotron resonance spectrometry.
