福井 謙一
Kenichi Fukui

It was a pleasure to meet Prof. Nozoe again on the occasion of my visit to Tokyo for the IUPAC Executive Committee meeting at Chemical Society of Japan. I recalled first meeting you at a party given by Dr. Theodora Stephens at her home in Oxford when you had just retired from Tohoku University in 1966; also we met again in Taipei in December 1982 on the occasion of Golden Jubilee of Chinese Chemical Society.

Good luck with the Kopolones research as you near your 81st birthday!

Mo Williams

Executive Secretary IUPAC
