To Professor Nozoe

It is a great pleasure for me to meet Professor Nozoe, whose research I have known of since I was a student (1956, under Louis Fieser). This is my first visit to Japan, and I have enjoyed the excitement of this country and the beauty of your city of Sendai.

Charles F. Perrin

September 1, 1986

To Professor Nozoe.

Japan has been a wonderful experience, which has been made all the greater by meeting you. I value all my Japanese friends, more so, now that I have visited Japan. I look forward to returning again, and again.

Uairly H. Perrin

To Professor Nozoe:

It has been marvellous to visit Sendai again after sixteen years. The friendliness with which I have been greeted has been overwhelming and I am enjoying myself tremendously. In addition to the science, the banquet, the sushi bars, and other delights of the town, I must admit that the trip to Kurikoma yama 栗川山 was one of the highlights.

I shall be looking forward to returning - and arigato gozai mas!

Joel Ulrich
